

LETTER FROM GENERAL MANAGEMENT

PETROQUIM, as the only polypropylene producing company in Chile, together with all its valuable collaborators, and throughout 25 years of history, has been able to consolidate itself as a leader at a productive, business and labor level.

Our sustained development is based on three fundamental pillars: the **Economic-Business Pillar**, focused on shareholders and customers; the **Social Pillar**, in direct relation to the welfare of our employees; and the **Environmental Pillar**, where we strive to always be responsible and care for our environment.

The inspiration and policies that have guided and channeled this development have always sought respect and compliance with legal regulations and the continuous improvement of all our processes and procedures, promoting a responsible business culture in all dimensions of corporate action: industrial, social, ethical, labor, and legal, as stated in our **Mission** and **Vision**.

We are a conservative and innovative company at the same time: conservative in the essentials that have guaranteed sustained progress, and innovative in the permanent search to optimize our processes, exploring new products and generating new business opportunities in the petrochemical and energy fields, promoting the development of our collaborators and good and healthy commercial relations with our clients and suppliers.

Our **Code of Ethics** is framed within PETROQUIM S.A.'s Crime Prevention Policy, in the performance of each and every one of its activities, not only to ensure that our activities comply with the current regulations, but also to endorse our commitment to seek and comply with the highest ethical standards and principles of Good Corporate Governance.

Jorge García Rodríguez
General Manager
